

## PA30145 & PA30146

Outer & Inner Air Elements

Hyundai Excavators and Loaders with Cummins engines are used in mining, construction, and road building operations. All of these work areas can be extremely dusty when the equipment is in operation. The PA30145 & PA30146 air filters from Baldwin offer great dirt holding capacity and highly efficient media to ensure protection of these important engines and their air systems with OE matching quality and function.
